Liberal MPP Jeff Leal has a choice:

Protect

the people of Peterborough from even higher hydro bills – by voting against Bill 91

OR

Fall in line with the *sellout* of Hydro One – a one-time dead-end cash grab at the expense of future generations.

Important message to members and supporters of the Ontario Liberal Party:

Even **partial privatization** has brought soaring electricity rates in countries around the world. Small business owners, farmers and residents cannot afford to pay more for electricity.

Future generations will need the perpetual flow of hundreds of millions of dollars from our public Hydro One — to pay for public services like health care and education.

If Bill 91 is passed, Liberal MPPs like Jeff Leal, the Ontario Liberal Party and Premier Wynne **will be held responsible for the consequences.**

There are many reasons to keep Hydro One in public hands.
